

User guide

New formulation and application rate for sclerotinia control in kiwifruit.

Luna Privilege has always set the standard for sclerotinia control in kiwifruit.

This will continue with a new 250SC formulation, which contains 250 grams of fluopyram per litre, instead of 500 grams of active ingredient previously. This changes the application rate. The use rate for Luna Privilege is now 600 mL/ha.

Important Information – see below for new use recommendations.

LUNA® PRIVILEGE 250SC: USE IN KIWIFRUIT

Disease	Sclerotinia (<i>sclerotinia sclerotiorum</i>).
Application rate	40 mL/100L in 1500 L of water per ha. Ensure a minimum of 600 mL/ha is applied.
Application Timing	Make a single application from 7 days prior to the start of flowering up to 80% flowering. NB: The Zespri Crop Protection Standard limits use of Luna Privilege over flowering. Consult the latest version for use recommendations of Luna Privilege.
WHP	Consult the latest version of the Zespri Crop Protection Standard for use recommendations of Luna Privilege.
Rainfastness	2 hours when applied to dry canopy in good drying conditions.
Water Rate	Apply in 1000 – 1600 litres of water/ha without excessive run off.
Adjuvants	None required.
Compatibility	Apply Luna Privilege alone when applying during flowering. When applying before flowering Luna Privilege is compatible and crop-safe when tank mixed with Movento® 100SC, Prodigy™, Actigard™, Kocide™ Opti and Nordox™ 75WG.
Pack Size	5 Litres.

NEW 5 litre PACK SIZE!

The new 250SC formulation comes in a 5 litre bottle. This replaces the 1 litre bottle that contained the Luna Privilege 500SC.

Luna Privilege 500SC
1 litre Bottle: Use 300 mL/ha

Luna Privilege 250SC
5 litre Bottle: Use 600 mL/ha
