PROSARÒ**PROSARÒ**

Diseases controlled	A range of foliar diseases of wheat, barley and ryegrass seed crops (see side table)
Crop	Wheat, barley and ryegrass seed crops applied between GS25 to GS65
Rate	1.0 L/ha
Application timing	Apply at the first signs of disease. Re-apply 3-4 weeks later if required. For blind seed disease apply at the start of flowering then repeat 10-14 days later
Application method	By tractor mounted hydraulic boom sprayer or by aerial application
Water rate	200 L/ha water by ground application or 50 L/ha by aerial application
Rainfastness	Rainfast 1 hour after application when applied to a dry crop
Withholding period	Wheat and barley: 56 days (grain) or 42 days (forage) Ryegrass seed crops: 30 days (seed) or 35 days (forage)
No. applications / crop	Maximum two per crop
Compatibility	Compatible with a wide range of commonly used herbicides and insecticides
Pack size	15 litres
Approved handler	Approved handler status is required

Summary of diseases controlled:	
Wheat	Barley
Septoria leaf blotch	Scald
Stripe rust	Net blotch
Leaf rust	Spot blotch
Powdery mildew	Ramularia leaf spot
Glume blotch	Leaf rust
Ear disease complex	
Ryegrass seed crops	
Crown rust	
Stem rust	
Blind seed disease
