

BAYER UTE CARD™

Proteus® – fast, sound and secure control of all major pests in potatoes and thrips in onions

proteus®

Benefits

- ▶ **Proteus** is a convenient one product solution that controls all the major pests in potatoes (aphids, potato tuber moth and tomato/potato psyllid) as well as thrips in onions.
- ▶ **Proteus** contains two active ingredients that have systemic and residual properties providing quick knockdown and residual control.
- ▶ **Proteus** contains unique OTEQ formulation technology which requires no further additional adjuvants.
- ▶ **Proteus** is an easy to use liquid formulation.
